

ERRORS:

1. You call the SimpleFormController via Post with the 1st Request.
 - SuccessView does not know the CommandClass.
2. You call the FormView from AnotherController via GET/POST.
 - FormView does not know the CommandClass.

NOTE 1: ViewResolver was ignored to simplify the Request Flow.

NOTE 2: If you want to skip the ViewResolver, you need to use the redirect flag.

```
return new ModelAndView("user.htm");           //user.htm.jsp will be resolved
return new ModelAndView("redirect:user.htm");    //user.htm will be the next page
```
