

```

Public class UserController extends HttpServlet {
    Service(request, response)
    {
        //1. Create and populate the model
        ArrayList<User> userlist() = new ArrayList<User>();
        Userlist.add(new User());
        Userlist.add(new User());
        Userlist.add(new User());
        Userlist.add(new User());

        //2. Place the model to a SCOPE
        Request.setAttribute("userlist", userlist);

        //3. Navigate to the VIEW Page
        RequestDispatcher rd ...
        Rd.forward(request, response);
    }
}

```

---

```

<html>
<body>
    <%
        //Absolutely NO SCRIPTLET
        ArrayList<User> users = request.getAttribute("userlist");
        For (User u : users)
            Out.println(u.getFirst());
    %>
</body>
</html>

```
